

HUDAIF AHAMED

Software Developer | .NET | C# | Azure | PostgreSQL

+91 9964850100 | hudaifahamed08@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Mangaluru, India

SUMMARY & KEY ACHIEVEMENTS

Software Developer with 2 years of experience building and deploying enterprise-grade .NET microservices for Swedish and Norwegian energy companies at EG India. Skilled in C#, ASP.NET Core (.NET 10), Azure, and PostgreSQL and RESTful APIs on the backend, with frontend exposure in Blazor. Comfortable owning features end-to-end — from development to Azure deployment. Worked in Agile/Scrum teams, delivering features in bi-weekly sprints.

- Deployed production microservices architecture to Azure Container Apps, supporting multiple Nordic energy customers while maintaining a 99.2% uptime SLA across environments.
- Architected secure identity integration using Keycloak and OAuth2, locking down API access across all ASP.NET Core microservices with automated realm configuration.
- Implemented centralized structured logging (Serilog) with strict GDPR compliance and an error code taxonomy, accelerating production incident resolution times by 40%.

TECHNICAL SKILLS

- **Languages:** C#, HTML, CSS, SQL
- **Frameworks/ORMs:** ASP.NET Core (.NET 10), Entity Framework Core (EF Core), .NET Aspire, Blazor
- **Cloud/Azure:** Azure Container Apps, Blob/Queue Storage, Key Vault, Application Insights, Azure DevOps
- **Auth & Security:** Keycloak, OAuth2
- **Databases & Testing:** PostgreSQL, MS SQL Server | Unit Testing - xUnit
- **Tools:** Git, GitHub Actions (CI/CD), Docker, Postman, Serilog, Visual Studio, VS Code

WORK EXPERIENCE

EG India — Mangaluru, Karnataka (On-site)

Software Developer

Nov 2024 – Present

- Developed and deployed multiple ASP.NET Core (.NET 10) microservices processing millions of invoices during month-end traffic peaks for Swedish and Norwegian energy clients.
- Implemented distributed tracing via Application Insights and transient fault handling retry logic, maintaining a <0.5% production error rate.
- Engineered secure OAuth2 identity layers (Keycloak) and centralized, GDPR-compliant logging (Serilog), slashing active incident response times by 40%.
- Configured Azure infrastructure (Container Apps, Blob/Queue Storage, Key Vault) and automated deployment workflows using GitHub Actions CI/CD pipelines.

Software Developer Trainee

Aug 2024 – Nov 2024

- Architected and executed the 'EG Flow' microservices POC using .NET Aspire, creating an asynchronous pipeline that parsed XML invoices to PDF using Azure Queue and Blob Storage.

Exelon Circuits Pvt. Ltd. — Mangalore, India

Front-End Developer Intern

Jul 2023 – Aug 2023

- Developed an Appointment Booking System web application using React.js with a focus on responsive UX.

EDUCATION

B.E. Computer Science & Engineering (CGPA: 8.73) — NMAM Institute of Technology, Nitte | Sep 2021 – Apr 2024
(Internships completed during final year and joined EG India as Trainee in August 2024 – no gap)

CERTIFICATIONS

- Foundational C# (freeCodeCamp, Aug 2024) | Postman: Engineer Learning Path (Aug 2024)
- Azure for Developers: API Management (LinkedIn, Jul 2025) | PostgreSQL Essential Training (LinkedIn, Aug 2024)
